| • Social Impacts of Video Gaming | • Computer Science            |
| • Human/Computer Interaction     | • Social Informatics          |
| • Information Visualization      | • Social Media and Work       |

## Projects

### Membership and Subscription management app

- Constructed a high-fidelity prototype that allows users to easily manage memberships and subscriptions linked to a credit/debit card.

### Star Wars mission with high quality setting

- Built a WebGL5 setting in which "Luke" must find his saber aboard an Imperial Star destroyer.

### New York dog naming in correlation to the nations favorite movie franchises and characters

- Mined data from New York dog licensing, extracted most popular dog names based on movie character, compared to national census.
